CARE and LIEE Rapid Deployment Update

**Presented to the California Public
Utilities Commission
February 8, 2002**

**Kirsten Stacey
Manager, Low Income Energy Management**

PG&E's CARE Rapid Deployment Update

- CARE enrollment and penetration
- CARE post-enrollment verification
- CARE outreach strategies

PG&E CARE Penetration by

County

PG&E Proposed CARE Penetration Rate

Program Year	Projected CARE Participation(in Households)	Participation (Percentage of Total Population)	Percent Change
2002	684,161	62.60%	27.70%
2003	822,450	74.30%	20.20%
2004	930,735	82.90%	13.20%
2005	960,092	84.30%	3.20%

Increasing CARE Penetration: Challenges

Re-certification

- Every 2 years
- Equivalent effort for new enrollment
- As enrollment increases, maintaining penetration requires increasing effort resulting in a diminishing rate of return

CARE Post-Enrollment Verification Process

Random post enrollment verification

- Select 2% of all applications received daily
- Represents 2% of total enrolled customers
- 90 days for customers to respond with income documentation

29% Removed from CARE

- 27% did not respond, dropped
- 2% did respond, found ineligible, dropped

CARE Outreach Pilot Project: Incorporating Successful Strategies

Successful outreach pilot project strategies to increase
CARE enrollment

- Targeted language specific advertising
- CARE presence at Local community events
- Public media partnerships
- Simplified in-the-bill application
- Postage-paid return applications
- Capitation agreements with trusted community based organizations

PG&E's LIEE Rapid Deployment Update

- Accomplishments to date
- Contractors
- Expenditures
- LIEE Rapid Deployment Implementation

PG&E 2001 LIEE Accomplishments

■ Homes Treated	47,308
■ Homes Weatherized	31,678
■ Refrigerators	7,035
■ Evaporative Coolers	4,548
■ CFLs	162,097
■ Air Conditioners	68
■ Attic Insulations	3,045
■ Furnace Repair & Replace	1,165
■ Water Heaters	547

LIEE Contractors

PG&E Contractors Enrolled

PG&E LIEE Monthly Expenditures

PG&E's LIEE Monthly Expenditure for 2001

LIEE Rapid Deployment Implementation

LIEE 2001 implementation

- Re-bidding process caused delay
- New measures caused additional delay in mid-year
- Slow ramp up into 3rd quarter

LIEE 2002 implementation

- Trained contractors now in place
- Maintain current participation levels throughout 2002
- On target to reach participation and expenditure goals by December 2002

PY 2001	554,038	5,476	0.99%	1,199	27%	74	2%	1,273	28.59%	0.23%

Note: No action has been taken on customers requested to verify during the last three months. Per CPUC guidelines, they have 90 days to provide proof of eligibility.

CARE Processing Activity - Cumulative

CARE Processing Monthly Activity

CARE Discount and Avoided Surcharges

PG&E Capitation Contractors Enrolled

- 84 Community Based Organizations signed agreements for outreach and capitation
- 34 counties served within the PG&E territory

84 PG&E Capitation Contractors

- 49 serve African Americans
- 54 serve Latinos
- 33 serve Asian-Pacific Americans
- 26 serve Vietnamese
- 26 serve Hmong
- 23 serve Chinese
- 13 serve California Indians

Some contractors serve multiple counties; therefore, total add up to more than 100%

PG&E Capitation Contractors

LIEE Homes Treated

PG&E's LIEE Program Homes Treated in 2001

PG&E 2001 Rapid Deployment Energy Savings

- Total 1,340 kW
- Total 1,237,550 kWh
- Total 530,175 therm

Based on measures installed and paid in 2001

PG&E LIEE Outreach Efforts

- Collaborate with ethnic media
- Attend community fairs and events
- Participate in community forums
- Provide education workshops and presentations to community groups

PG&E's LIEE Rapid Deployment Program on Target

- Contracts in place
- Contractors trained & ramped up
- Over 5,000 Refrigerators in pipeline
- Landlord Rebates in pipeline

PG&E's Proposed Goals for 2002

Homes Treated	66,000
Homes Weatherized	55,000
Refrigerators	15,000
Evaporative Coolers	5,000
Water Heaters	1,000
Expenditures	\$60 Million

PG&E LIEE Leveraging Efforts

- Leverage with La Cooperativa & Kern County EOC for refrigerator referrals
- Employ 11 LIHEAP provider contractors to leverage other programs and services

Southern California Edison
Company

**STATUS CONFERENCE AND PREHEARING CONFERENCE
ON LOW INCOME ASSISTANCE PROGRAMS (R.01-08-027)
Statement of Southern California Edison Company
February 8, 2002**

On January 7, 2002, Administrative Law Judge Gottstein scheduled a third status conference in Rulemaking 01-08-027 for February 8, 2002 to further update the Commission and interested parties on the utilities' rapid deployment achievements and to respond to the following questions.

1. The summary presentations should provide information on the increase in CARE penetration, units weatherized, types and quantities of measures installed and other indicators of what the program has accomplished since the inception of rapid deployment last spring.

[Please see attached progress report.]

2. Utilities should compare their current CARE penetration rates with their proposals for establishing future penetration rates.

Response: Southern California Edison's (SCE) stated goal for CARE penetration consists of enrolling all eligible customers who are willing to participate in CARE. At the time of filing its proposal, SCE's CARE penetration rate was approximately 86%. Currently, an estimated 88% of the technically-eligible customers are enrolled in CARE. SCE believes that with the continuation of expanded outreach efforts and the Capitation Program, SCE will be able to maintain and possibly increase the current penetration level.

3. Utilities should also discuss how they plan to incorporate the CARE Outreach Pilot Program into their future outreach efforts.

Response: SCE has already started incorporating recommendations obtained from the CARE Outreach Pilot Program, including the fee-based Capitation Program and outreach efforts with faith-based organizations, county agencies, CBOs and others. SCE plans to continue and build upon these efforts in 2002. SCE's service territory is widespread and its customer base is extremely diverse. To fully support the goal of building CARE participation as much as possible, SCE has designed an integrated, layered, multi-channel outreach effort to be implemented throughout 2002. Highlights of this effort include:

Capitation Program

The Capitation Program is a key component of SCE's strategy to outreach CARE.

Mass Media Outreach

Radio and local print advertising, bill inserts, sce.com and public relations will be utilized to create increased awareness of the CARE program throughout SCE's

**STATUS CONFERENCE AND PREHEARING CONFERENCE
ON LOW INCOME ASSISTANCE PROGRAMS (R.01-08-027)
Statement of Southern California Edison Company
February 8, 2002**

entire service territory. These efforts leverage low cost-per-contact vehicles to deliver the most efficient and effective communication to SCE's residential customer base. In addition, these efforts will be supported via brochures, fliers and fact sheets.

SCE Event/Grass Roots Outreach

Throughout the course of the year, SCE will host, participate, and fund a number of events (Community fairs, County information seminars, awareness events, etc.) through which CARE program information can be distributed in a cost effective manner. Based on the demographics of the events, both English and in-language materials may be available.

Targeted and Ethnic Media Outreach

In-language advertising (Spanish, Asian languages and others) and targeted local radio and print advertising will be used to reach customers that reside in specific geographic areas where CARE enrollment is low relative to potential. These media will also be called upon to reach rural and other designated hard-to-reach customers. Direct mailers will be targeted to customers that, based on demographic data available, may qualify for CARE, but have not yet enrolled in the program. These campaigns will also be supported via in-language brochures, fliers and fact sheets.

Strategic Alliance Outreach

To further increase program enrollment, SCE has formed strategic alliances with cities, counties, non-profit and faith-based organizations, and trade associations. Through these alliances, SCE will be able to cost effectively extend its ability to reach customers that may qualify for the CARE program (including both ethnic and hard to reach customers). In conjunction with these groups, CARE program information will be communicated via face-to-face contact, community and association events, meeting/event presentations, bill inserts, articles and/or advertising in organization publications.

4. In addition presentations should include the results to date of the utilities' CARE post-enrollment verification processes, e.g., what percentage of new CARE applications have been deemed after-the-fact to not qualify for the program

Response: For 2001, SCE met its target of verifying at least 1% of its estimated enrolled CARE customers. Due to the increased efforts required to process new applications, the majority of SCE's post-enrollment verifications were completed in the second half of the year. Reports of these efforts have been delayed somewhat. Below is a breakdown of verifications received in PY2001. System issues also delayed the mailing of recertifications for PY2001. Results of those received to-date are presented below. The start-up of a Capitation Program Tracking system was also somewhat delayed and to

**STATUS CONFERENCE AND PREHEARING CONFERENCE
ON LOW INCOME ASSISTANCE PROGRAMS (R.01-08-027)
Statement of Southern California Edison Company
February 8, 2002**

date, approximately 32 verification requests have been sent to Capitation Program participants.

PY 2001 Verifications

- Total Participants Requested to Verify – 9,492
- Verifications that Exceed Program Income Guidelines - 630
- Verifications Returned to Customer for Additional Information – 1,048
- Verifications No Response – 817
- % Dropped Due to Verifications – 15%

PY 2001 Recertifications

- Received 96,366
- Process 47,934
- Rejected 5850

Results of January PY 2002 Verifications Received To Date

- Verifications Qualify - 492
- Verifications Exceed - 47
- Verifications Returned - 424
- Verifications No Response - 176

PY2002 Verification and Recertification Requests

- Request for Verifications Initiated in Jan 2002: 1,244
- Request for Recertifications Initiated in Jan 2002: 21,192

Attachment 5

Rapid Deployment Status Conference February 8, 2002

Handout of Requested Information Pursuant to the Administrative Law Judge's Ruling of January 7, 2002

1. Increase in CARE penetration

The table below shows the increase/decrease in CARE penetration during PY 2001. Net increase in CARE penetration for the year was 19%.

SCG Increase in CARE Penetration

Month/Year	Current Month CARE Enrollment	YTD CARE Enrollment	Estimated CARE Eligible	Total CARE Participants	Estimated Penetration	Penetration Increase
Jan-01	1,468	1,468	848,602	550,626	64.9%	
Feb-01	10,115	11,583	848,734	560,741	66.1%	1.2%
Mar-01	17,724	29,307	835,160	578,465	69.3%	3.2%
* Apr-01	16,057	45,364	1,105,314	594,522	53.8%	-15.5%
May-01	19,722	65,086	1,104,346	614,244	55.6%	1.8%
Jun-01	11,344	76,430	1,100,334	625,588	56.9%	1.2%
Jul-01	918	77,348	1,100,334	626,506	56.9%	0.1%
Aug-01	6,571	83,919	1,098,690	633,077	57.6%	0.7%
Sep-01	7,178	91,097	1,107,767	640,255	57.8%	0.2%
Oct-01	1,955	93,052	1,089,115	642,210	59.0%	1.2%
Nov-01	7,286	100,338	1,088,705	649,496	59.7%	0.7%
Dec-01	5,950	106,288	1,090,360	655,446	60.1%	0.5%

* Interim CARE methodology approved by the Commission in March 2001 (D.01-03-028) was used to estimate CARE eligibility.

Southern
California
Gas Company

A Semptra Energy company

Rapid Deployment Conference
February 8, 2002

2. Compare CARE penetration rates against future proposals

The table below shows SCG CARE penetration goals over the next 4 years. Estimates were based on achieving 85% penetration over the next few years. The aggressive increase to be achieved in 2002 is a result of planning CARE outreach using the additional funds available for marketing and outreach of the CARE program under the SB5 legislation.

SCG Penetration Goals

Year	Customers Projected to be Eligible for CARE	Annual Percentage Change in CARE-Eligible Customers¹	Projected Number of CARE Participants	CARE Penetration Rate	Annual Percentage Change in CARE Penetration¹
2001	1,088,703	32.3%	649,496	60%	-8.0%
2002	1,097,747	1.2%	772,396	70%	12.3%
2003	1,108,571	1.0%	841,034	76%	5.8%
2004	1,125,097	1.5%	907,315	81%	4.4%
2005	1,139,649	1.3%	968,701	85%	4.9%

¹ The large percentage increase in CARE-eligible customers and decline in CARE annual penetration between 2000 and 2001 are due to the change in CARE eligible customer methodology and the income eligibility levels from 150% of the federal poverty level (FPL) to 175% FPL in June 2001.

3. How to incorporate results of the CARE Outreach pilot program into future efforts

Current outreach efforts are to:

- Continue to use bill inserts and SoCalGas newsletters to notify customers about CARE.
- Continue to distribute CARE and other income-qualified program information through utility low-income energy assistance program materials, bill assistance payment materials, bill messages, etc.
- Continue to provide CARE and bill assistance information with collections notices.
- Continue to offer CARE to all residential customers when they call to initiate service, request payment arrangements, or change the name on the account.
- Continue to offer CARE as part of the on-hold and interactive voice response messages on customer service lines.
- Continue to publish the quarterly CARE bill message in English and Spanish.
- Continue to publish the customer services brochures on low-income assistance programs, i.e. CARE, LIEE, in English, Spanish, Korean, Vietnamese, and Chinese. Brochures are hand delivered to customers at every turn-on, service order, high bill and/or leak investigation.
- Continue to provide spoken and written multi-lingual utility outreach information to customers in English, Spanish, Korean, Vietnamese, and Chinese.
- Continue community-based outreach, including continued use of capitation contracts, face-to-face outreach, and leveraging with state and federal assistance programs, such as LIHEAP.
- Continue media campaigns consistent with the availability of SB5 funding.
- Continue outreach through area employers, at benefit fairs, and similar events by having CARE applications and knowledgeable, bi-lingual utility representatives available who can explain the program and/or enroll customers on-site.
- Continue to use the SoCalGas website to provide information about CARE and an English/Spanish CARE application that can be downloaded.

Southern
California
Gas Company

A  Sema Energy company

**Rapid Deployment Conference
February 8, 2002**

3. How to incorporate results of the CARE Outreach pilot program into future efforts (continued)

Future potential outreach efforts:

- Provide CARE applications for pay envelopes and countertop displays as requested by Human Resource Departments, social service agency offices, etc.
- Partner with city, county, and federal assistance offices to provide training for employees and provide offices with countertop displays.
- Partner with military housing and military assistance agencies to train staff and provide displays.
- Partner with the local Employment Development Department offices to distribute an informational package including a CARE application and other assistance program information to new jobless benefits applicants.
- Research the possibility of using billboards in non-English communities, or placing placards on buses or other commercial vehicles.
- Research placing advertisements in select commercial laundromats and/or grocery stores.
- Research providing educational programs to be offered to middle schools for use in Economics or Science classes.

4. Results to date of CARE Post Enrollment Verification

The table below shows the results of SCG PEV process. The process randomly selects CARE customers per day to be mailed the verification form. SCG is currently in the process of conducting a telephone survey to better understand why so many of those dropped are non-respondents to the verification.

SCG CARE Post Enrollment Verification

Month/Year	Total CARE Population	# of Requested to Verify	% of Population Total	# of Participants Dropped (Due to no response)	# of Participants Dropped (Verified as Ineligible) or (Customer Requested termination) ¹	Total Dropped	% Dropped through Random Verification	% of Total Population Dropped
Jan-01	550,626	8264	1.5%	0	3	3	0%	0%
Feb-01	560,741	9648	1.7%	5	153	158	2%	0%
Mar-01	578,465	12928	2.2%	7	286	293	2%	0%
Apr-01	594,522	11320	1.9%	1408	278	1,686	15%	0%
May-01	614,244	11858	1.9%	2587	394	2,981	25%	0%
Jun-01	625,588	11259	1.8%	4178	271	4,449	40%	1%
Jul-01	626,506	10567	1.7%	4602	182	4,784	45%	1%
Aug-01	633,077	12378	2.0%	4902	273	5,175	42%	1%
Sep-01	640,255	10109	1.6%	4386	241	4,627	46%	1%
Oct-01	642,210	12234	1.9%	4738	236	4,974	41%	1%
Nov-01	649,946	10328	1.6%	4936	208	5,144	50%	1%
Dec-01	655,446	8755	1.3%	4934	138	5,072	58%	1%
Total 2001	655,446	129,648	20%	36,683	2,663	39,346	30%	6%

¹ SoCalGas random verification process allows customers 90 days to respond to the verification request. As a result, the number of customers dropped in any given month includes requests for verification that were issued several months prior.

5. Percentage of new CARE applications that don't qualify after PEV

See table above for this information including the footnote on the 90-day allowance for customers to respond.

**Rapid Deployment Conference
February 8, 2002**

6. Accomplishments since last Spring

A. CARE

- As of December 31, 2001, SoCalGas had 43 CARE Contractors participating in rapid deployment (43 signed contracts)
- SoCalGas continues to negotiate with other interested agencies and organizations to participate in CARE rapid deployment
- 63 parties responded to SoCalGas' initial solicitation to participate in CARE rapid deployment.
- Since then, several additional parties have expressed interest in participating
- All interested parties have been sent CARE training packages and exemplary service contracts.
- SoCalGas will continue to identify additional parties for contracting, for example, soliciting agencies at its Gas Assistance Fund (GAF) orientation meetings.
- SoCalGas has contacted a number of Native American communities (tribes, bands, groups, and organizations) regarding CARE rapid deployment.
- To date, the American Indian Health Project in Los Angeles is a CARE Contractor; they propose to enroll 1,200 new CARE customers.
- SoCalGas has been in discussions with 8 Native American communities. SoCalGas has explained the CARE program, solicited their participation as CARE contractors, and forwarded postage-paid self-mailer applications, when requested.
- See Attachment: Southern California Gas Company's CARE Outreach and Leveraging Initiatives since Spring 2001.
- See Attachment: Southern California Gas Company's CARE Media Initiatives Since Spring 2001.

6. Accomplishments since last Spring (continued)

B. DAP

- Collaboration with Department of Community Services Department and leveraging with LIHEAP providers by providing water heaters to LIHEAP providers for installation under the CSD program in order to maximize funds and services.
- California Conservation Corps distribution of DAP materials in conjunction with the summer CFL community outreach program.
- Development of new low-income services brochure, which covers assistance programs available such as CARE, DAP, Level Pay, Third Party Notification, Gas Assistance Fund, Medical Baseline, Payment Arrangements and LIHEAP.
- Utilization of existing DAP database to identify potential customers for outreach associated with water heater and furnace installations. Qualification verification utilizing CARE PEV and Revert customers to expedite delivery of services.
- Participation in community events such as Rebuilding Together, Esperanza Community Housing Family Festival, African Marketplace, Fiestas Patrias, LA City Partnership, Earth Day Celebration and the LA Marathon to provide program information at the neighborhood level.
- Collaborative efforts with Edison on Native American Outreach and proposal for co-funding of air conditioning/heating installations in low-income multi-family housing in order to leverage funds and provide services to additional customers for both utilities.
- Development of rural outreach project targeting the hard-to-reach customers in Imperial and Kings County, which will be implemented in PY2002. This project incorporates an enhanced energy education element, which focuses on educating customers about the measures and how changing behaviors can favorably impact their energy usage and bills.
- See Attachment, LIEE Outreach/Leveraging Initiatives, Southern California Gas Company.

SDG&E plans to expend all of the 2002 Available Funds during PY2002.

Information on the following pages and the attachments responds to the January 7, 2002, ALJ Ruling requesting status information on San Diego Gas & Electric Company's Rapid Deployment efforts and accomplishments related to the utility's CARE and LIEE programs.

1. Increase in CARE penetration

Table I below shows the increase/decrease in CARE Penetration during PY 2001. Net increase in CARE participants for the year was 8.4% (net increase in penetration rate was 5.52%).

I. SDG&E's Increase in CARE Penetration

Month	Monthly CARE Enrollment	YTD Enrolled	Estimated CARE Eligible	Total CARE Participants	Estimated Penetration	Penetration Increase
January	1744	1744	244,035	139,373	57.11%	
February	2423	4167	244,436	139,490	57.07%	-0.07%
March	2434	6601	244,762	139,743	57.09%	0.04%
April	2322	8923	244,636	139,769	57.13%	0.07%
May	3012	11,935	245,313	141,264	57.59%	0.81%
June	4531	16,466	243,235	142,462	58.57%	1.70%
July	3953	20,419	242,899	145,693	59.98%	2.41%
August	8131	28,550	242,764	148,178	61.04%	1.77%
September	4324	32,874	242,356	148,728	61.37%	0.54%
October	4181	37,055	242,202	150,119	61.98%	0.99%
November	3033	40,088	241,677	149,323	61.79%	-0.31%
December	3945	44,033	241,282	151,121	62.63%	1.36%

2. Compare CARE penetration rates against future proposals

Table II and Table III show SDG&E's CARE penetration goals over the next 5 years by fuel use. Estimates were based on achieving 85% penetration at the end of the 5-year period. The aggressive increase to be achieved in 2002 is a result of planning CARE outreach using the additional funds available for marketing and outreach of the CARE program under the SB5 legislation and allocated SDG&E by the Commission. Smaller increases are projected for the balance of the 5-year period as SB5 funds are depleted and incremental enrollments become more difficult to accomplish.

Table II--SDG&E Electric Customers CARE Penetration Goals

Year	Projected Number of Customers Eligible for CARE	Annual %Change of CARE Eligible Customers	Projected Number of CARE Participants	% of CARE Penetration	Annual % Change in Penetration
2001	241,283		151,121	63%	
2002	249,505	3.2%	187,129	75%	12.4%
2003	253,021	1.4%	197,850	78%	3.2%
2004	256,586	1.4%	209,186	82%	3.3%
2005	260,201	1.4%	221,171	85%	3.5%

Table III--SDG&E Gas Customers Penetration Goals

Year	Projected Number of Customers Eligible for CARE	Annual %Change of CARE Eligible Customers	Projected Number of CARE Participants	% of CARE Penetration	Annual % Change in Penetration
2001	173,986		101,023	58%	
2002	177,175	2.0%	132,881	75%	16.9%
2003	179,761	1.4%	140,494	78%	3.2%
2004	181,778	1.2%	148,544	82%	3.5%
2005	184,770	1.7%	157,054	85%	3.3%

Note: SDG&E's figures have been updated for 2001 from the Company's filing of December 19, 2001, to reflect actual penetration as of the end of 2001.

3. How to incorporate results of CARE Outreach pilot program into future efforts

SDG&E has already begun to incorporate lessons learned from the 2000-2001 CARE Outreach Pilot and reported in the CARE Outreach Pilot on October 24, 2001. The pilot results indicated enrollment in CARE could be increased if we were to:

- Work with agencies that offer one-on-one services.
- Offer CARE in conjunction with limited type events, church events, community fairs, city sponsored events, etc.
- Work with local community agencies that understand the barriers in their communities, e.g. language, trust
- Offer CARE through door-to-door canvassing by local agency staff
- Offer CARE outreach contracts to local agencies on a “fee per customer enrollment basis”
- Offer CARE in conjunction with other local programs with similar program income guidelines, e.g. DAP, unemployment services

During PY2001, SDG&E began using all of the above methods to outreach its CARE program. Efforts are continuing through 2002.

- SDG&E has eight capitation contractors (enrollment) who are being paid on a “fee per enrollment basis” which offer one-on-one services.
- SDG&E has one outreach contractor who is canvassing door-to-door in lowest income neighborhoods to enroll customers in CARE.
- Our DAP contractor is required to enroll LIEE customers in CARE if they are qualified and are not already participating.
- During 2001 SDG&E provided CARE information and distributed applications at over 100 local community events.

4. Results to date of CARE Post Enrollment Verification

The 48% and 47% drop off rates shown in Table IV and IVB (Attachment 1) need to be viewed with the understanding that SDG&E screens its non-capitation CARE participants using a probability model. The model, developed by an independent third-party economic research firm, identifies those customers with a high probability of not being eligible for CARE prior to issuing a request for income verification. The model uses Microvision socio-economic indicators, consumption history, home ownership information, and estimates of CARE-eligible customers at the zip code level to select from a random sample of CARE customers those customers who are in the top 15 percentile as likely to be unqualified for CARE.

Using a probability model as part of the random sample process increases the efficiency of the verification process and minimizes the verification of customers who are, in all likelihood, qualified for CARE—qualified customers who perhaps would be non-responsive to the request to verify and be dropped from the CARE rate.

SDG&E would like to better understand why so many of those dropped through its verification are non-respondents. To this intent, SDG&E has begun to compile data on the reasons participants are not responding to the request for verification. We are surveying non-respondents to collect a minimum of 6 months worth of data, and we are planning a customer focus group comprised of non-respondents to help us identify if there are any actions SDG&E can take to decrease the number of non-respondents.

5. Accomplishments Since Last Spring

CARE:

■ Number of CARE Capitation Contracts

- SDG&E currently has signed enrollment contracts with 8 organizations. Additional proposals have been received from three organizations and are expected to be signed mid-February.
- Contractors submitted a total of 1,575 application and enrolled 1,098 customers into the CARE program.

■ Other New Practices Introduced

- CARE launched it's first ever television campaign. The ads were featured in both Spanish and English and ran for a six-week period. The campaign generated over 400 customer calls requesting more information and/or CARE applications.
- SDG&E contracted with an outside agency to provide door-to-door outreach to low income areas throughout San Diego. The effort has added over 1,000 customers since it was implemented in October and has the highest enrollment rate (number of customers enrolled/number of applications received) of any SDG&E or third- party effort at 85%.
- An SDG&E "Outreach Team" was established to focus on reaching the limited-income and hard-to-reach customer. The team attended over 100 events including toy drives, health fairs and lighting events at which CARE materials were distributed.
- SDG&E's Outreach Team contacted local employers, such as hotels, where employees were minimum wage earners and/or were facing possible layoffs in order to provide CARE information and applications to those employees. The team provided some employers with information and applications to be included in employee paychecks and attended several employee fairs.
- SDG&E also met with the California Employment Development Department employees and state disability intake personnel to provide education about CARE and other customer assistance programs to enable them to provide CARE applications and/or make referrals to the programs.
- In response to ABX1 3, SDG&E initiated a policy of providing CARE applications to all residential customers who receive collection notices at their residence for overdue bills. This effort has resulted in 738 applications being submitted in 2001. SDG&E has incorporated this practice as a standard collection policy.

5. Accomplishments Since Last Spring (cont'd)

CARE (cont'd):

■ Customer Assistance Brochure

- A customer assistance brochure was created as a leave-behind for SDG&E field representatives making collection calls. The brochure, printed in English, Spanish and Vietnamese, highlights the CARE program and other assistance programs, such as LIHEAP and DAP. The popular brochure became a useful tool and was used as a handout at all outreach events. This initial effort led to a multi-lingual assistance package that includes a CARE application, assistance brochure, mail-in audit information, information on conservation, and long-term savings steps.

■ Other Media Events

- CARE advertised in over 15 newspapers covering six different languages and a variety of age groups. This effort produced 1,228 applications and enrolled 779 customers into the CARE program.
- CARE launched a radio campaign, featuring the voices of SDG&E Customer Service Representatives. The ads were in Spanish and English.
- CARE posters were developed to be featured in employment offices, human resource centers and community agencies. The Posters are in Spanish and English.

5. Accomplishments Since Last Spring (cont'd)

LIEE

■ Leveraging

Memorandums of Understanding (MOUs)

MOUs were signed and implemented with several San Diego based organizations with an emphasis on the use of RD funding authorized for LIEE and appliance replacements to leverage programs offered through the Department of Community Services and Development (DCSD). Listed below please find the organizations that signed with SDG&E in PY 2001 and will be participating through PY 2002. Also listed are specific requirements under the agreements that are enabling SDG&E and the participating organizations to effectively provide weatherization, energy education, lighting and appliance services to low-income customers and maximize penetration of the low-income community. The MOUs have afforded both SDG&E and DCSD providers to offer a seamless process to the participant that is unprecedented.

At minimum the MOUs establish the following:

- A referral process that allows the participating organization to refer clients to SDG&E's LIEE/RD programs.
- It also allows for SDG&E to refer LIEE/RD customers to LIHEAP weatherization services (if applicable) and the HEAP bill payment assistance program.
- Each participating organization agrees to provide a description of SDG&E's LIEE/RD programs to all potential participants including the income eligibility requirements and program services offered
- The exchange of customer information, including income, address, phone number, etc. to be kept confidential and only for use to deliver LIHEAP, LIEE or RD services.
- Response to referrals by each party to be within a reasonable time period, not to exceed 30 days.
- Meetings/conference calls to discuss outreach strategies and participation levels, etc.

Additionally, some MOUs include:

- Pricing advantages to DCSD funded programs by purchasing appliances in bulk for delivery and installation, as well as recycling when applicable.
- Employment opportunities for tribal members including hiring member(s) to perform the marketing/outreach/assessment and in-home energy education segment of the process to potential participants.
- Training of tribal member(s) to ensure adequate knowledge of program services and the assessment process.

5. Accomplishments Since Last Spring (cont'd)

LIEE Leveraging (cont'd)

The following organizations have entered into an MOU with SDG&E.

- Campeños Unidos Inc. (CUI) - 7/16/01

In PY 2001 CUI referred sixty-five customers to SDG&E's LIEE/RD programs to offer energy education, compact fluorescent lightbulbs, weatherization services and appliance replacements. CUI's funds were frozen at the time and they were able to leverage with SDG&E to ensure services needed were available to their clients.

CUI reported \$574,391 in leveraged dollars, of which \$288,544 were leveraged with SDG&E, for the period of 10/1/00 through 9/30/01 when seeking additional LIHEAP funds from the Federal Department of Health and Human Services.

- San Diego American Indian Health Center (SDAIHC) - 8/1/01

In PY 2001 SDAIHC referred twenty-five clients to SDG&E's LIEE/RD programs and they were offered energy education, compact fluorescent lightbulbs, weatherization services and appliance replacements.

- Metropolitan Area Advisory Committee (MAAC) Project - 8/13/01

In PY 2001 MAAC referred 150 clients to SDG&E's RD program which offered delivery and installation of new energy star rated refrigerators, as well as, the removal and recycling of the old units. MAAC also referred thirty-five customers for refrigerator and RD offered services due to a funding freeze they experienced.

MAAC reported \$627,698 in leveraged dollars with SDG&E for the period of 10/1/00 through 9/30/01 when seeking additional LIHEAP funds from the Federal Department of Health and Human Services.

- Orange County Community Development Council (OCCDC) - 8/24/01

In PY 2001 SDG&E referred a 125 unit senior mobile home park in Southern Orange County to OCCDC for participation in the weatherization services they provide. SDG&E will be offering energy efficient electric appliances to those residents of the park who are deemed eligible by OCCDC.

- Rincon Band of Luiseno Mission Indians of the Rincon Reservation, California In PY 2001 a tribal member was hired to perform the outreach and installation of CFL's in participants' homes. To date thirty units on the reservation have received assessment, and are scheduled to receive program services.

- Pala Band of Indians (federally recognized)- 11/28/01

Staffing and training needs are being finalized with Pala as tribal members will be employed to perform outreach and marketing.

5. Accomplishments Since Last Spring (cont'd)

LIEE

■ Master-Metered Properties

- SDG&E began offering program services to master-metered properties as required by the Commission in (D.) 01-05-033 (dated 5/3/01).
- In PY 2001 SDG&E marketed and assessed 484 master-metered units within SDG&E's service territory that were eligible for and received RD program services including appliance replacement and weatherization.
- Of those 484 master-metered units 86 units required an incentive payment by the landlord due to the fact the landlord paid the utility bill and owned the appliance.
- Of the 484 units participating, 347 units were occupied by seniors.

■ Rural Areas

- SDG&E also worked effectively to provide program services to geographic areas that may have appeared to be underserved in the past, particularly the rural areas of Alpine, Bonsall, Boulevard, Descanso, Dulzura, Jacumba, Jamul, Julian, Borrego Springs, Fallbrook, Pauma Valley, Potrero, Ramona, Valley Center and Warner Springs.
- In PY 2001 SDG&E provided services to 786 customers in those regions for a total of \$216,300 of RD program dollars spent. Services including everything from weatherization to lighting to appliance replacement.
- A direct mail piece that describes income eligibility and program services is being developed and will be offered in both English and Spanish to over 2,000 residents of Borrego Springs in February, 2002.

■ Outreach

- SDG&E used its database of prior LIEE customers to identify customers who qualified for additional RD measures.
- Brochures in SDG&E's assistance programs were provided to County Department of Housing and Community Development to be made available at their offices handling Section 8 clients.
- Agreement was made with Southern California Housing to provide appliance replacements and other measure installations to qualified tenants of Section 8 housing.
- Published program information in the Golden State Manufactured Home Owners Association monthly newspaper.

6. LIEE Homes Treated and Weatherized

Table V below provides information on the number of homes treated and weatherized by program type.

Table V—SDG&E Homes Treated and Weatherized—PY2001

	December 2001		Year-to-Date		Total
	SBX5	PY2001 Base	SBX5	PY2001	Combined
Homes Treated	2,503	1,251	6,171	13,508	19,679
Homes Weatherized	1,987	863	1,987	9,524	11,511

Note: Number of homes weatherized with SB5 funds has been revised upwards since January 22, 2002 Rapid Deployment Report to reflect actual homes weatherized.

7. Types and Quantities of Measures Installed

Table VI (Attachment 2) provides the total number of measures installed during PY2001 under both Rapid Deployment and LIEE programs. Installations include:

Compact Fluorescents	2,062
Refrigerators	2,833
Waterheaters	423
Air Conditioners	379
Low flow showerheads	1,168
Weatherstripping/Caulking	861/854
Attic Insulation	30

Table IV - CARE Standard Random Verification Results - December, 2001

	Total CARE Population	# of Requested to Verify	% of Population Total	# of Participants Dropped (Due to no response)	# of Participants Dropped (Verified as Ineligible)	Total Dropped	% Dropped through Random Verification	% of Total Population Dropped
January-01	139373	181	0.13%			85

December-01	130	27	20.77%	0	0	0		
Total For PY 2001	1437	57	3.97%	2	3	5	8.77%	0.35%

Table IV - Combined CARE Standard Random Verification Results - December, 2001

	Total SB&S Outreach and CARE Population	Total # Requested to Verify	% of Population Total	Total # of Participants Dropped (Due to no response)	Total # of Participants Dropped (Verified as Ineligible)	Total Dropped	% Dropped through Random Verification	% of Total Population Dropped
January-01	139373	181	0.13%			85		
February-01	139490	125	0.09%			70		
March-01	139743	230	0.16%			67		
April-01	139769	184	0.13%			65		
May-01	141264	150	0.11%			80		
June-01	142462	35	0.02%			92		
July-01	145693	27	0.02%			85		
August-01	148178	97	0.07%			17		
September-01	148995	128	0.09%	9	10	19		
October-01	150407	119	0.08%	5	14	19		
November-01	150075	88	0.06%	44	13	57		
December-01	151251	152	0.10%	49	8	57		
Total For PY 2001	151251	1516	1.00%	107	45	713	47.03%	0.47%

Note: The 47.03% drop off rate shown in Table IV (Attachment 1) needs to be viewed with the understanding that SDG&E screens its CARE participants using a probability model which determines which customers have a high probability of not being eligible for CARE prior to issuing a request for income verification. The model, developed by an independent third-party economic research firm, uses consumption history, home ownership information, and estimates of CARE-eligible customers at the zip code level to select for verification those customers who have a 15% or less likelihood of being qualified for CARE.
